

\*\*\*\*\*

## MMS1 4 ounce (120 ml) Spray Bottle Protocol:

\*\*\*\*\*

For topical use; spray area with MMS1. Use for any kind of skin problems ~ skin cancer, eczema, psoriasis, infections, wounds, bruises; any skin conditions except burns. With skin problems it is important to start right away, spraying the skin as soon as you can to begin your health recovery. This spray bottle protocol can be used for the rest of your life for any skin problems, whether or not you are on other MMS protocols.

- Start with 10 ACTIVATED\* drops of MMS in a CLEAN, DRY GLASS.
- You may use up to 40 activated drops of MMS per 4 ounces of water however, work your way up to this, find what works for you.
- Add 4 ounces of CLEAN, PURE water; distilled, zero or reverse osmosis.
- Pour this solution into a small spray bottle, plastic or glass is fine.
- Spray on the effected area every hour and allow it to air dry.

\*\*\*\*

\*ACTIVATED means:

for 1 drop Sodium Chlorite (NaClO<sub>2</sub>) 22-25% solution,  
add 1 drop Hydrochloric Acid (HCl) 4%-5% solution to activate it  
activated CD solution releases and contains chlorine dioxide gas

\*Anytime the MMS spray stings or burns your skin (very much) go to the Mold/ Fungus Protocol.

\*You may want to avoid using this protocol on a sunburn as the acid activator can cause discomfort.

\*For Burns, use only (Part A) unactivated, pure 25% sodium chlorite NaClO<sub>2</sub> solution. Spray on, then rinse off with water within 3 minutes; never leave on more than 5 minutes. It may be re-applied after rinsing. 25% NaClO<sub>2</sub> solution can turn 3rd degree burns into 1st degree burns.

\*Always keep sealed and out of the sun to avoid weakening the solution. If kept refrigerated this solution should last at least 1 week, maybe several weeks. When it becomes very light yellow, it may have lost most potency.

\*The MMS Spray Bottle Protocol has many uses. You can use this protocol to disinfect kitchen and bathrooms, even to clean your veggies and fruit.

\*\*\*\*\*  
MMS2 4 ounce (120 ml) Spray Bottle Protocol:  
\*\*\*\*\*

The MMS2 spray bottle protocol can also cure skin issues. MMS2 is Calcium Hypochlorite, or, Ca(ClO)2. Do NOT use MMS2 in the eyes.

Ingredients:

- 120 ml/cc or 4 oz. spray bottle
- .5 - 1 gram of MMS2 cleansing powder
- 120 ml/cc or 4 oz. of warm water
- 1 glass cup

Instructions:

Mix the 0.5 or 1.0 grams of MMS2 Powder with the 120 ml/cc of warm water in the glass cup until completely dissolved. You can use warm water to dissolve it quickly. Pour into spray bottle and use frequently for best results.

\*Always keep out of the sun to avoid weakening the solution.
